PLAYFAIR CIPHER

Aim: To implement an encryption algorithm using Playfair Cipher technique.

Algorithm:

- Step 1: "Algorithm" (as the key) and "ulroaliocvrx" (as the encrypted text).
- Step 2: Remove spaces and convert to lowercase.
- Step 3: Create a 5x5 key table based on the modified key.
- Step 4: Apply Playfair Cipher decryption to the encrypted text using the generated key table.
- Step 5: Display the deciphered text.

Program:

```c
#include <stdio.h>
#include <stdlib.h>
#include <string.h>   #define

{
   int i;

         plain[i] += 32;
   }
}
int removeSpaces(char* plain, int ps)
{
   int i, count = 0;
   for (i = 0; i < ps; i++)
```

```c
